Cache

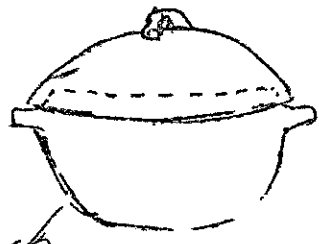

While the prov. disintegrations are not in a form that I would have used, this is a cache - recounted in the medical altar. I have no specifics regarding its exact horizontal location at this time, however, they also lie in the field notes. The cache vessel contained the following items.

- 1- jade disk/ bead width: 3.9 cm thickness: 0.85 cm
with curved circle with residue
- 2. jade bead 0.45 cm long w/ residue
- 3. red & white stone bead 1.55 cm long
x pink
- 4. frag. of coral 1.25 cm long
- 5. tiny jade rectangle 0.29 cm long
- 6. ocean shell frag 1.43 cm long
- 7. tiny jade rectangle 0.2 cm long
- 8. red stone bead 0.34 cm long
- 9. green stone frag very crystalline 0.43 cm long
- 10. ocean shell frag 0.9 cm long
- 11. metal frag (copper) 0.59 cm long
- 12. shell (ocean?) frag 0.94 cm long

The vessel was the standard lidded vessel with loop handles on the sides & one on the lid. It differed from others because the lid was a little oversized.

It was also odd because the lid was very difficult to remove from the vessel once it had been sealed for the cache.

There is a mark from the rim on the lid. This is the result of the seal. I am not sure if the seal was the result of a seal I put on the rim.

The interior of the vessel was covered with a white residue was found inside the pot (one of the objects). It may have been burned copper though there is no odor and it does not look like copper ever used elsewhere. The burning inside the pot & extinguishing could have also caused a seal (if it seems unlikely).

The vessel itself does not have a rim, but has a lid. Part of the rim of the lid has evidence of a slip or wash.

Note that two of the objects inside the pot were tiny greenstone rectangles that look as if they may have once been a mosaic.

The pot of this cache was 7.3 cm tall and the lid (without handle) added 3 cm to this. The handle added another 1.9 cm.

Censers from Structure 764 at Zacpetén

Non-effigy Censers

Gotas Composite Censers

(These vessels have blackened and burned interiors.)

- 1) V1 The censer is a partly reconstructed pedestal vase with impressions in the clay and appliquéd spikes.
- 2) V2 This vessel is similar to V1, but it does not have a rolled rim. It is a small, very thin walled vessel (lot 16490).

Mumúl Composite Censers

- 3) V3 This vessel has a short rim and one spike (lot 16524).
- 4) V4 The censer is a cup fragment with a group of four spikes.
- 5) V6 This a small cup with careless finger punctations.
- 6) V7 This cup is identical to V6, but it has a double line of punctations that are in opposite directions.
- 7) V8 The censer is a very large and thick with a pedestal base, finger impressions, and a notched flange.
- 8) Pedestal base
- 9) Pedestal base
- 10) This vessel is composed of a thick sandy paste.
- 11) This is also a thick sandy paste vessel with four spikes.

La Justa Composite Censers

12) V5

This is a cup with spikes and a high outflaring rim.

Extranjeras Impressed Censers

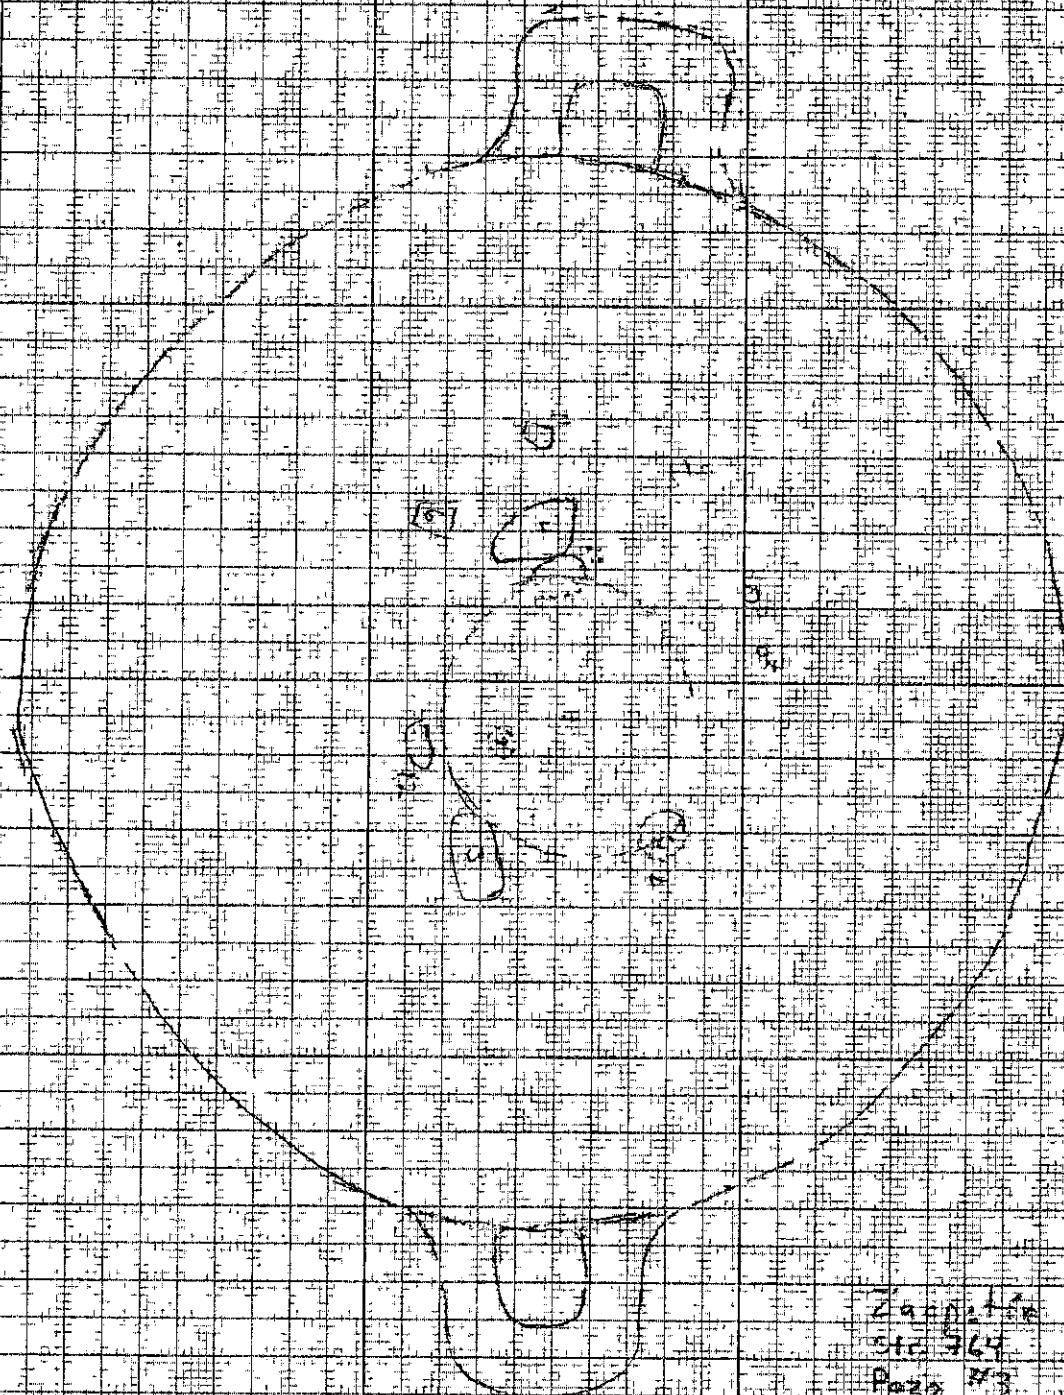

13)

This censer is represented by a bolster rim with finger impressions and a disc.

Fijate Composite Censers

14)

The censer consists of a sherd with a spike and a sherd with fingernail impressions.
