

Str: 615

Tripod bases - we have found a few tripod supports. Notably, we found two in lot 8206. These vessels are also indication of special practices. I will note when there are high frequencies.

Actually, there may have been an entire vessel in the area of 8206.

9150

Carved Limestone Phallia

The limestone phallia that I described in my notes from last year is from Lot 8037 Str 615, Level 2, 493, 5502. This object is important, because we found one of these at Nixon Creek Str. 188 and one in Str. 766 of Zaq'ib. They are part of the activities that took place in the halls, though I will not speculate upon what type of activities those could have been.

The phallia is 12.72 cm long, 8.7 cm wide and 3.64 cm thick.

This one looks almost like a mushroom, but because of the one at Nixon... I am fairly certain that it is a phallia.

Str. 615

1/22/97

Found part of a spekeophen in Str. 615 lot 5803.

Remember the crystals in Str. 188 of Nixon.

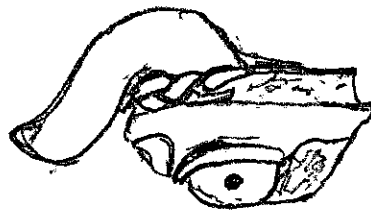

- This object was found in unit 471,555 which lies adjacent (to the south) of the southeast corner of the structure

Censer head Pitufu Mod.

Large head, fangs, ear spools, serpent hat,
